## Professional Summary

Engineer specialised in **Automation and Applied Informatics** with a strong passion for machine learning, control systems and software development. Currently employed as an **AI/ML Engineer at MyAI**, where I design and deploy intelligent systems to solve real-world problems. Proficient in Python, TensorFlow and modern data-driven technologies; looking to contribute to innovative projects in AI and automation.

## Experience

### AI/ML Engineer — MyAI (Apr 2024 – Present)

- Develop and deploy machine-learning and deep-learning models for computer vision, natural language processing and recommendation systems.
- Build end-to-end AI pipelines, integrating data ingestion, model training, optimisation and deployment on cloud platforms (AWS, Google Cloud, Azure).
- Collaborate with cross-functional teams to translate research into production-ready solutions; perform hyper-parameter tuning and A/B testing to improve performance.

## Education

**Engineer Degree in Automation and Applied Informatics**, “Dunărea de Jos” University of Galați (2020 – 2024)

- Coursework in control systems, robotics, machine learning, computer programming and automation.

## Projects

- **Algae Growth Control:** Developed a machine-learning controller for algae growth using TensorFlow integrated with MATLAB/Simulink. Achieved precise biomass concentration regulation.
- **League of Legends Match Predictor:** Built a predictive model to forecast match outcomes and recommend champions, utilising TensorFlow and the Rainforest algorithm.
- **AI Database Agent:** Created a natural-language interface for querying SQL databases and CSV files using LangChain and LangGraph, with a Streamlit user interface.
- **Intelligent Chatbot:** Designed a desktop chatbot application using Python and Tkinter, exploring integration of language models into a graphical user interface.

## Skills

- **Programming:** Python, MATLAB/Simulink, Java, JavaScript, C/C++, SQL, HTML/CSS
- **Frameworks & Tools:** TensorFlow, PyTorch, Django, Flask, LangChain, Rainforest, Streamlit, Docker, Kubernetes, Git
- **Operating Systems:** Linux (Ubuntu), Windows
- **CAD:** AutoCAD 2D/3D
- **Other:** Data analysis, control systems design, machine learning, deep learning, MLOps

## Languages

English (B2/B1), Russian (B1/B1)

## Certifications

Engineer in Automation and Applied Computer Science

## Interests

Continuous learning in AI and robotics, outdoor activities, Latin dancing, travelling and swimming.
